

SUM IT UP!

Create a bulletin board display where these and other math words and their definitions can be displayed. Call on students to add new math terms and art or pictures that illustrate terms to the display. Periodically review the words and call students' attention to the new words that have been added.

Match each math word on the left with its correct definition on the right. (Answers in Teacher Edition Volume 1, Issue 4.)

- | | |
|-------------|--|
| 1. twae | a negative quantity |
| 2. ogdoad | 1/8 of a circle |
